

UVC Sanitizer – SABER U60 and U30

The C band Ultra Violet (UVC) light based Sanitizer is equipment to disinfect from the common types of bacteria and pathogens through an exposure to UVC light source.

It can be used to disinfect electronic items, grocery items, fruits & vegetables, face masks, etc

Saber products are designed for reliable and long lasting life. Both U60 and U30 use two UVC tubes for proper and effective sanitization and continued operation in case one of the tubes fails.

The exposure time is based on the UVC dosage required for sanitizing most of the pathogens and bacteria.

Safety Features

- Door Sensing switch to automatically turn-off in case door is opened.
- Casing designed to ensure that there is no leakage of UV light

Product Specification

Parameter	Saber U60	Saber U30
UV Type	UVC	
Wavelength	254nm	
Wattage	2 x 11 Watts	2 x 8 Watts
Dimensions	18"x18"x12"	15"x12"x12"
Inner Capacity	60 Litre	30 Litre
Timer	Up to 3 minutes	
Inner lining	Aluminium Sheet	
Body	MS Steel—18 Gauge	
Supply Voltage	220V AC 50 Hz	

Safety Warning

- Don't try to look in for UV light or try to sanitize bare skin using the equipment
- Long exposures of UV light to skin and eye causes rashes, irritation and skin cancer.
- Use equipment as per manufacturer guidelines only.
